

Plate 1
RADON-HAZARD-POTENTIAL MAPS
Special Study 90
Utah Geological Survey
1996

- EXPLANATION**
- High radon-hazard potential. Areas in which all geologic factors contribute to indoor-radon hazards.
 - Moderate radon-hazard potential. Areas in which some geologic factors contribute to indoor-radon hazards.
 - Low radon-hazard potential. Areas in which no geologic factors contribute to indoor-radon hazards.
 - Areas not studied due to lack of access or soil-permeability data.
 - Indoor radon sample location and concentration in picocuries per liter (pCi/L). Multiple concentrations indicate several closely spaced sample locations.
